Old Business:  
Joel has submitted orders for trashcans. There is now one outside of the Community Practice Clinic.  
The request for a lock on the 3rd floor women’s bathroom in the H wing Small Animal corridor was submitted.  
A room number was requested, but it has none. Abbie will submit an e-ticket to advance the request.  
The Large Animal Operating Room women’s locker room showers (by checkout area of the clinic) need a thorough cleaning.  
Parking Services will be asked to provide temporary handicapped parking spots.  
The floor of the Large Animal Operating Room is still slippery. The state contract probably provides a deep discount for croc’s for staff and animal owners to use on site; these provide good traction on the floor.

New Business:  
AHRC is _not_ a unit of Vet Med and therefore does not require a representative to the CVM SRG.  
It was proposed that the SRG request vending machines for the Physiology/Pharmacology end of the building.  
The door between the hospital and the student lobby can be hazardous for anyone on the opening side of the door when it is opened swiftly. It was proposed that signs be posted on both sides of the door to caution people.  
Streets are dark between the building and the parking deck. Lights have been eliminated and replaced with an on-call escort service. There was discussion of how to address this issue.  
It was suggested that SRG representatives attend the dean’s forum to promote awareness of the SRG and hand out the newsletter to staff members.

Meeting was adjourned ~2:50pm
