Immunohistochemical Stains for Selected Infectious Agents

Antibodies to identify various infectious agents	
<i>Viral agents - species specific</i>	<i>Bacterial agents</i>
Bovine Herpesvirus	<i>Anaplasma</i> sp.
Bovine Respiratory Syncytial Virus	<i>Bartonella henselae</i>
Bovine Viral Diarrhea Virus	<i>Borrelia burgdorferi</i>
Canine Adenovirus Type I	<i>Campylobacter</i> sp.
Canine Distemper Virus	<i>Chlamydia</i> sp.
Coronavirus Group I (FIP, TGE, CCV)	<i>Francisella tularensis</i>
Coronavirus Group II (Bovine, Elk)	<i>Leptospira</i> sp.
Eastern Equine Encephalitis Virus	<i>Listeria monocytogenes</i>
Epizootic Hemorrhagic Disease Virus of Deer	<i>Mycoplasma</i> sp.
Parvovirus (Canine and Feline)	<i>Fungal agents</i>
Vesicular Stomatitis Virus	<i>Aspergillus</i> sp.
<i>Viral agents - non-species specific</i>	<i>Blastomyces dermatitidis</i>
Influenza A Virus	<i>Coccidioides immitis</i>
Papillomavirus	<i>Histoplasma capsulatum</i>
Rabies Virus	<i>Protozoal agents</i>
West Nile Virus	<i>Cryptosporidium parvum</i>
	<i>Neospora caninum</i>
	<i>Sarcocystis neurona</i>
	<i>Toxoplasma gondii</i>
